

Step by Step Instructions Adding a Hamburger to the Menu

This example will show how to add a hamburger to the menu.

This will include how to prepare the burger.

This will include items to add to the burger.

Select Point of Sale – Management – Edit Speed Buttons.

Since Burger is a submenu from the main screen, right click on the Burger menu box.

This will show a menu of options that may be selected.

Select Edit / Add Menu.

If the information is assigned to a menu (i.e. the item starts with a #), selecting this will display that menu for editing. Note: Double clicking the Item will do the same.

API002	Cheese Sticks w/ Sauce
API003	Fries Small
API004	Fries Large
API005	Saxon Fries
API006	Onion Rings
API007	Fried Clam Strips
API008	Loaded Baked Potato
API009	Fontabella Mushroom
API010	Breaded Mushrooms
API011	Fried Hot Peppers
API012	Fried Italian Greens/Pepper
API013	Potato Skins
	Breaded Wings
	Fresh Wings
	Beer Battered Fries
	Paulaner 12oz
	Coffee
	Hot Tea
	Milk
	Hot Chocolate
	Ice Tea
	Soda
BEV007	Soda Can

The Burger menu screen will display.

Find a Burger menu button to edit and right click the menu.

Select Edit/Add Item Addons.

This is the screen to set up how to prepare the burger, what cheese if any to put on it and what condiments to add.

Note the number of times to repeat on condiments. This allows the server to select up to 5 condiments for this burger. Always set this to the maximum you think will be used.

The server can stop adding condiments at any time during the entry but can enter no more than 5 in this example.

The Column to Price states which column to use for this burger when pricing condiments.

To change the prepare options, select the Addon button next to @Prepare.

An option can be added on the bottom line where the * row is located.

An option can be deleted by selecting the row to delete and pressing the Del key. Or just edit the information on the row.

Taxable, Always Tax, After Tax, Any additional price for the prepare (usually zero) and the color of that button.

Do the same for the @Cheese option to add, delete or edit any cheese for the burger.

Note the Extra Cheese option has a 25 cent charge for the burger.

This is the current condiment screen.

Saxon Burger | Column to use: 1 | Times to display: 5

Condiments may be used for any item that is sold. So the same condiment screen can be entered as an addon anywhere. Use the Column to Price option to set up pricing for different situations.

The Burger uses column 1 for pricing.

The Cole Slaw option in the condiments screen will charge 1.00 to add cole slaw to the burger.

POSTransfer

File Utilities

Server Location: C:\WB6Proj\MerchMgr\W31 | Custom Information:

Server Database: AAdvisorCAF.MDB | Drawers use same Company: | RX Days: 2 | debug:

Days to Keep History: 30

Drawers: 1 2 3 4 5 6 7 8 9 10

0 3 6 9
 1 4 7 10
 2 5 8

Single Date:

Transfer Inventory | Pull Daily Sales | Update Maintenance | Exit

Transfer Customer Info | Transfer Software Updates

Push these changes to each Server Terminal.

From Point of Sale – Utilities – Load Server.

Make sure the Speed Buttons option are set to: Copy from Drawer = 0. This means the menu that was built at the back office (Drawer 0) will be copied to the drawer numbers checked.

Select Transfer Inventory which will move the menu buttons and any item changes to the terminals.

HOW IT WORKS
 Select Saxon Burger from the screen at a server station.

The first screen to appear is from the @Prepare option that was built.

Notice the buttons and colors match what was entered.

When the server either selects a prepare option or presses Done, the Prepare screen will disappear because the addon was set to repeat only one time. The selected item will be sent to the order screen.

Next is the @Cheese option which allows only one entry.

Select Extra Cheese and the additional charge of 25 cents will be added to the order.

The last addon @Condiments will display allowing up to 5 selections.

If the server selects Done at any time, the Condiments screen will disappear and the selected items will be added to the order.

Select No Tomato – Black Olives and Cole Slaw.

The extra charge of \$1.00 will be added to the order for the Cole Slaw.
