Complete      Saxon Manager 10/27/2009

A change has been added to allow the server to pull up a sale if it appears to be deleted. This may happen when a sale is entered on one computer and called up for editing on another computer.

When the detail cannot be found, the message at left will display. If the server answers Yes to "Do you wish to search for this sale?" The next screen will display.

Recover a lost sale

The server can press any of the drawer buttons.

If a sale with that number is on the computer matching the drawer selected, the date and time of the sale will display at the top of the window. The detail will display in the box. The server will know if the information is the correct sale.

Press Recover to pull that information into a new sale.

**The sale has been restored to slip # 9.**

OK

The sale will be given a new sale number. Press OK.

Note: The server will need to delete the sale that was in question.

The recover lost sales screen – That is accessed from the Manager button has been changed to allow viewing any saved sales on any of the drawers. Select the drawer to view and sales on that computer will display.

NOTE: Be patient when selecting a drawer. The system has to first open a connection on that computer, then open the files.
