

MasterCard Partial Approval Mandate (MCPAM)

| | |
|--|---|
| | <p>To allow partial approvals to be accepted during Credit Card payments</p> <p>This will ONLY work when using X-Charge version 7.1.5.</p> <p>Previous versions of X-Charge are no longer compliant.</p> <p>A Password must now be setup and passed to the Processing software. From Point of Sale – Utilities – Card Reader Setup, select the NEW password button.</p> |
| | <p>This displays the password setup screen. NOTE: This is only for X-CHARGE version 7.1.5 or later.</p> <p>The default login and password for x-charge is login: system pwd: system</p> <p>X-Charge now requires you to change the password from the default. After changing it in X-Charge, enter the same password on this screen.</p> |

The screenshot shows a software window titled "X-Charge 7.1 Release 5 (Default)". At the top, there are three icons: a printer for "Receipt", a trash can for "Clear", and a power button for "Exit". Below this is a dark blue header bar with the text "Credit Card - Purchase" and a small icon on the right. The main area contains a form with the following fields:

- Amount: 1.00
- Credit Card #: - SWIPE CREDIT CARD -
- Expiration (MMYY): 0111
- * ZIP Code: (dropdown menu)
- * Address: (text input)
- * CVV2/CVC2: (text input)
- * Receipt #: 0094761
- * Clerk ID: MANAGER (dropdown menu)

At the bottom of the form is a button labeled "[F12] Process". Below the form area, there is a small text box that says "Scan credit card or enter credit card number".

The new login / password will automatically be passed to x-charge.

Another new option is to allow partial payments and balances remaining on a card.

If the amount being charged is more than X-charge returns as allowed, the operator can accept only the amount approved and take additional payments for the remainder. Even additional credit card payments.

Some cards will return the amount still available on the card. When this happens, that amount will print on the customers receipt.
